WORK & LEADERSHIP EXPERIENCE

THEXRA SDN BHD

Klang, Selangor, Malaysia

Associate Solutions Engineer

May 2026 – August 2026

- Engineered immersive XR and AI-driven industrial safety training applications, conducting R&D to digitize complex engineering workflows into interactive assets that significantly reduced new hire training time.
- Formulated strategic enterprise business proposals and designed a comprehensive XR development curriculum for the CelcomDigi Metaversity Internship Programme, mentoring a 5-person team through a structured project lifecycle.

XR Coordinator

Nov 2025 – May 2026

- Developed AR/VR applications and custom 3D assets, while managing hardware configurations and on-site technical support for live client demonstrations, exhibitions, and workshops.

Jacvid Technology Supply & Service

Klang, Selangor, Malaysia

Online Manager

March 2023 – June 2023

- Administered backend e-commerce operations across jacmore.com, Shopee, and Lazada and produced promotional multimedia assets to boost digital customer engagement.

ArrayHubs

Klang, Selangor, Malaysia

Software Developer Intern

August 2022 – February 2023

- Developed responsive web applications and custom WordPress CMS solutions using CodeIgniter and front-end web technologies, optimizing SQL queries to improve system performance.

Key Projects

Sanguine Echoes | *Phaser 4, Typescript, Vite*

[Game Link](#)

- Engineered a 2D gothic roguelite featuring frame-accurate combat, dynamic recovery systems, and customizable progression trees across three levels, optimized with Vite for web deployment.

Delight's Despair | *Unity, C#, URP*

[Itch.io](#)

- Designed and engineered a first-person psychological horror game featuring interactive environmental puzzles, dynamic AI enemy mechanics, and optimized modular scene loading.

Speak Up! - Multiagent VR Training | *Unity, OpenAI APIs, Ready Player Me*

[GitHub Repo](#)

- Engineered a VR educational app for public speaking training featuring AI-driven multi-agent NPCs that deliver real-time conversational feedback and live performance evaluation.

ZeroWasteHub | *Flutter, Dart, Firebase*

[Video Demo](#)

- Developed a cross-platform community sustainability mobile app featuring real-time Firebase authentication, Firestore database sync, and location-based recycling center directories.
